- Replacement Blade : WER9902Y

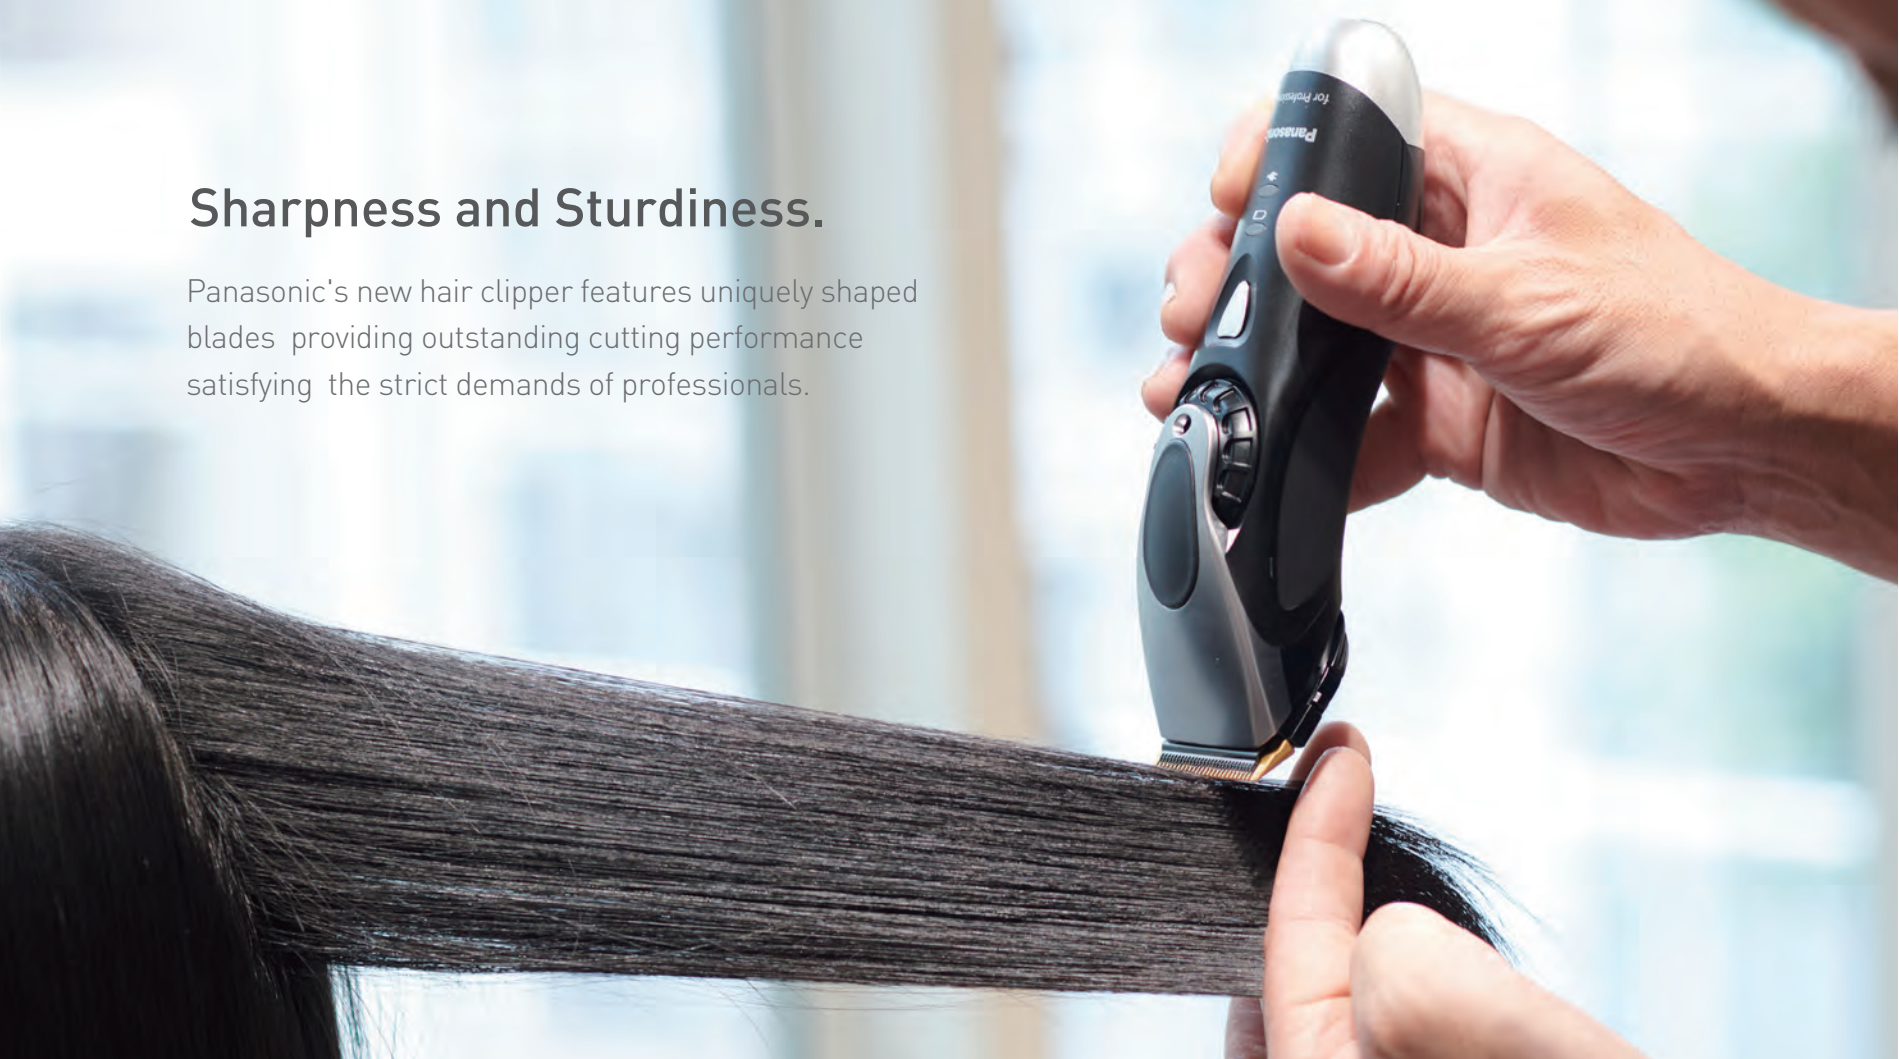

ER-FGP72

for Professionals

Sharpness and Sturdiness.

Panasonic's new hair clipper features uniquely shaped blades providing outstanding cutting performance satisfying the strict demands of professionals.

01

FINE BLADE TECHNOLOGY

X-taper Blades that reduce stubble

Specially designed X-taper blades firmly catch and cut hairs that are often missed to thoroughly reduce stubble.

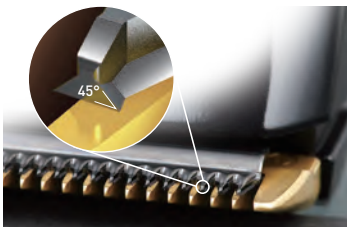

The shaped part of the X-taper blade captures any hair that enters

The sharp 45° blade prevents hair escaping and cleanly cuts it

Sharp 45° blade edge

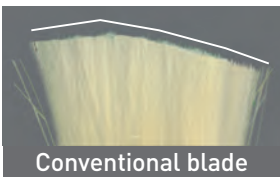

The sharp, precise 45° blade edge provides smooth, clean cutting.

A smoother cut result

X-taper blade

Conventional blade

Grabbing the hair badly with a standard cutting blade

02

NEW LINEAR MOTOR with CONSTANT CONTROL

Constant Control with advanced sensor technology detects the density of hair and automatically controls the speed of blade movement to assure smooth, steady cutting. The result is a clean cut even with dense hair.

Lightweight High-Power Linear Motor

Providing 10,000 strokes per minute, Panasonic's exclusive ultra high-speed linear motor drive provides smooth, constant cutting.

Even tufts of hair are smoothly cut with no drop in speed

Uniform cutting provides a clean finish
